

easiKit® XL CUBE SYSTEM

The easiKit® XL CUBE system combines a beautiful design with a high degree of flexibility and function: the modular concept of dividers allows for many layouts with various pocket sizes to accommodate different product formats. The display cubes enable you to build counter top or floor displays. The individual display cubes can easily be added or removed to meet your requirements.

The display cubes are made from high-resistant material. The clear plates and dividers make your product look brilliant and fully visible at all times. A bespoke header or print on the base can increase brand recognition at the Point of Sale.

Standard finish from stock:
